

Seclore & KLexServe partner to bring security and rights management to the legal services industry

Partnership of the leading Information Rights Management (IRM) player and the Kochhar Group's Legal Process Outsourcing (LPO) and knowledge driven solutions company intends to provide the next-generation, cutting edge technology combination to the legal services industry globally

India, Mumbai, 16 March 2011: Seclore, a high growth software product company focused on IRM technology and KLexServe, the leading legal process outsourcing and legal solutions company backed by **Kochhar & Co, one of the leading and largest corporate/commercial law firms** in the country today announced a strategic partnership.

Under this partnership KLexServe's key product portfolio consisting of its (1) Trademark & IP Portfolio Management, (2) Litigation Case Management and (3) Contract Lifecycle Management systems will now be available with Seclore FileSecure's rights management capabilities built in. Documents handled by these systems for each client are extremely sensitive and need to be managed, maintained and processed while maintaining the highest standards of data confidentiality, security, integrity and audit controls. At the same time business users need to have freedom in terms of methods of collaboration. This combination of collaboration and security requirement is fulfilled by Seclore FileSecure, the leading information rights management (IRM) system.

"After evaluating multiple technology and products within the information security space, we chose Seclore FileSecure as the technology to fortify our offerings. The primary reasons for this choice is the integration friendliness of the system and Seclore's overall dominance of the IRM space" said Manish Vig, Managing Director of KLexServe. "We are proud to partner with Seclore, a market leader in the IRM domain and are confident about the significant value which this unique partnership will bring to our global clients in the legal industry" he further added

Vishal Gupta, CEO of Seclore, on this occasion said *"KLexServe's growing dominance in providing solutions to the legal services industry is well recognized. The combined technology will help generate non linear value for the legal services industry, bringing the power of Seclore's information security and compliance solutions to KLexServe's domain focused collaboration solutions"*

About Seclore:

www.seclore.com

Seclore is a high growth software product company promoted by IIT Bombay. Seclore FileSecure and Seclore InfoSource help mitigate the risk arising out of information breaches and regulatory non-compliance whilst enhancing collaboration. This is done by providing ubiquitous technology for information control within and outside of the enterprise which seamlessly works with existing infrastructure, is easy to deploy & use and comes with pay-as-you-use pricing.
